

ANA 12 PLUS PROFILE

**ANTI- CCP & RHEUMATOID FACTOR NOW
ADDED TO THE ORIGINAL ANA 12 PROFILE**

- ▶ RDL Reference Laboratory is proud to announce an enhanced ANA 12 Profile (ANA 12 Plus) to assist in the evaluation of polyarthritis and related systemic autoimmune diseases that may be characterized by ANA positivity. The ANA 12 Plus Profile will be identical to the ANA 12 Profile with the addition of Anti-Cyclic Citrullinated Peptide Antibody (Anti-CCP) and Rheumatoid Factor by Nephelometry. *This will **not** replace the standard ANA 12 Profile.* The ANA 12 Plus is also a reflexive assay akin to the original ANA 12, and can be ordered as a “Do All”.

We believe that the ANA 12 Plus Profile will enhance the serologic evaluation of these diseases when accompanied by inflammatory polyarthritis. It will also reduce the cost of ordering the ANA 12 Profile with Anti-CCP and Rheumatoid Factor separately.

The client charge for a positive ANA 12 Plus is \$360.

ANA 12 PLUS PROFILE

Anti-Nuclear Ab (FANA)	Anti-Ro Ab (SS-A)
Anti-dsDNA Ab by Farr	Anti-La Ab (SS-B)
Anti-SM Ab	Anti-Centromere Ab
Anti-RNP Ab	C3 & C4 Complements
Anti-Scl-70 Ab	Anti-Thyroid Microsomal Ab

Anticardiolipin Abs (IgG, IgA, IgM Isotypes)

Anti-Chromatin Ab, IgG (Anti-Nucleosome Abs)

Anti-Cyclic Citrullinated Peptide Ab (Anti-CCP)

Rheumatoid Factor, IgM

Requirements: 4 mL serum, ambient, refrigerated or frozen.
