

REFLEXIVE INFLAMMATORY

POLYARTHRITIS/OLIOARTHRITIS PANEL

RDL Reference Laboratory is introducing three new reflexive panels to improve the evaluation of Polyarthrititis and Olioarthrititis. An Anti-Cyclic Citrullinated Peptide Ab (Anti-CCP) is first resulted. If that is positive, it reflexes to an IgM Rheumatoid Factor by Nephelometry (RF).

If the Anti-CCP is negative, there are three Reflexive Inflammatory Polyarthrititis/Olioarthrititis Panels (RIP) to choose from.

SERONEGATIVE ARTHRITIS PANEL I

HLA-B27

Anti-Parvoviral Ab, IgM & IgG

Hepatitis C Ab

Anti-Nuclear Ab

Lyme Disease by EIA, Reflexive to Western Blot if Positive by EIA

SERONEGATIVE ARTHRITIS PANEL II

Anti-CCP

HLA-B27

Anti-Parvoviral Ab, IgM & IgG

Hepatitis C Ab

SERONEGATIVE ARTHRITIS PANEL III

Anti-CCP

HLA-B27

Hepatitis C Ab
