By ordering a Profile or Panel, you are acknowledging you are ordering and will receive results for specified components.

Please be advised that when ordering tests that will be reimbursed by Medicare, only order testing that is medically necessary for the diagnosis of the patient.

The most frequently ordered assays are on the front of this requisition. Look on back of form for a listing of all our other panels and single tests not found on the front of this form. For a complete listing see our Test Catalog or Test Methodology & Specifications sheets.

All ANA Profiles are reflexive. If the ANA is negative, only an Anti-RO (SS-A) will be performed (unless a "DO ALL" Profile is checked). If the ANA is positive, all the tests specified under the profile will be performed. **ALL REFLEXIVE TESTING IS DESIGNATED IN RED**

*If any profiles, panels or tests have an asterisk after them, refer to the back of the form for special tubes, handling and requirements.

TESTS FROM THE FRONT PAGE

324 CPK (Serum must be frozen within 24 hours).

90 HLA-B27 (1 EDTA tube at room temperature. Do not spin, separate or refrigerate. Send by overnight FedEx.)

116 LUPUS ANTICOAGULANT (Draw in 2 sodium citrate tubes. Mix by inverting ten times. Check for fibrin clots using wooden applicator sticks [clotted specimen is unsatisfactory], centrifuge immediately for 15 minutes at 1,500 G, x 2 times to assure platelet-poor plasma. Do not let whole blood sit at room temperature for more than 20 minutes before centrifugation. Transfer to 2 plastic vials, 1 mL each labeled "Plasma". Plasma must be separated from the red cells before freezing. Freeze within 2 hours of draw & send on dry ice by overnight FedEx)

288 T-SPOT TB Test **Out of area clients can only be drawn Monday - Thursday. Please do not draw on Friday.** (Before drawing, call RDL for special supplies with gel pack. 1. Draw two lithium heparin [green top] tubes [6 mL each]. Invert ten times to mix. Do not centrifuge. Time of draw must be written on both tubes. Keep them at room temperature. NEVER REFRIGERATE OR FREEZE. 2. Keep the specimen at room temperature until the FEDEX courier picks it up. The specimen **must** be picked up the same day of draw.
